

This list is alphabetized by official project title and does not reflect any priority or preference whatsoever.  
This PDF is formatted to print on legal size paper.

Official Project Title	Potential Recipient	Requesting amount	Physical Address	Appropriations Bill	The funding would be used for:
1st District Land Grant Support	Canon de Carnue, Chilili, Monzano, San Antonio de Las Huertas, and Town of Tome Land grants	\$ 143,000.00	Chilili, 14 Old Chilili Rd, Chilili, New Mexico, 87059	Interior, Natural Resources and Related Agencies	The requested funding would be used for the purchase of forestry equipment to maintain common lands managed by the Land Grant communities of New Mexico's First Congressional District. The equipment would increase the capacity of the Land Grant communities to efficiently manage forest biomass resources for the purpose of retail and home heating needs. A secondary benefit of this funding would be an increased capacity to manage forested common lands against potential wildfire dangers, which currently threaten these rural communities. The requested project will create or sustain 0 jobs but direct benefits include fire prevention and fuel for heating purposes.
ACCENT: Adelante's Congressional Comprehensive Employment Network and Training	Adelante Development Center, Inc.	\$ 200,000.00	Adelante Development Center, located at 3900 Osuna Road, NE, Albuquerque, New Mexico, 87109	Financial Services and General Government	The requested funding for the Adelante Development Center's ACCENT program would be used to provide employment opportunities for people with physical and mental disabilities through a small business model that offers document imaging services to medical, financial, and legal clients. This project will both create new jobs for individuals with disabilities and provide opportunities to increase their independence and community participation. Expansion into the document imaging arena may create additional jobs in document shredding and recycling, which is Adelante's core service area. The requested project will create or sustain 30 jobs.
Albuquerque Metro Area Water and Reclamation Reuse	Albuquerque Bernalillo County Water Utility Authority	\$ 750,000.00	Albuquerque Bernalillo County Water Utility Authority, One Civic Plaza, NW, Room 5012, Albuquerque, New Mexico, 87102	Energy and Water Development	The requested funding would be used to complete construction of the Southside Reuse Project by the Albuquerque Bernalillo County Water Utility Authority. Through the reuse of effluent water for irrigation and industrial purposes, the Southside Reuse project will preserve and protect the aquifer that is the major source of drinking water for the Middle Rio Grande Valley. This project will reduce demand for potable water for commercial and industrial purposes and insure the availability of high quality drinking water for residents. The requested project will create or sustain 2 jobs plus construction jobs.
Bernalillo, NM (Section 205)	Army Corps of Engineers	\$ 400,000.00	Army Corps of Engineers – Albuquerque District, 4101 Jefferson Plaza, NE, Albuquerque, New Mexico, 87109	Energy and Water Development	The requested funding for the Bernalillo, NM (Section 205) Project would be used to fund a feasibility study for flood control system construction in Bernalillo. Existing flood control mechanisms lack the structural and engineering requirements to be certified by FEMA, creating conditions where residents are not adequately protected from damage by periodic flood events. Additionally, residents of Bernalillo are currently subject to flood insurance requirements based on recent FEMA remapping. The construction of an engineered flood control system would allow for a Letter of Map Revision from FEMA, which would enable residents to drop their flood control policies. The requested project will create or sustain 5 jobs.
Central New Mexico (section 593)	Army Corps of Engineers	\$ 5,000,000.00	Army Corps of Engineers – Albuquerque District, 4101 Jefferson Plaza, NE, Albuquerque, New Mexico, 87109	Energy and Water Development	The requested funding for the Central New Mexico (Section 593) program would be used to provide Army Corps of Engineers assistance to non-federal sponsors in the form of design and construction of water-related environmental infrastructure and resource protection; and assistance with publicly owned projects. The Middle Rio Grande Valley water resources are managed by numerous federal, state, and local agencies, each of whom play a specialized role. The efforts of these agencies are crucial to concerns in Central New Mexico including, but not limited to, public safety, resource conservation, resource sustainability, and environmental protection. The requested project will provide reimbursements for projects already completed.
City of Albuquerque Unser Boulevard Extension	City of Albuquerque	\$ 2,240,000.00	City of Albuquerque, One Civic Plaza, NW, Eleventh Floor, Albuquerque, New Mexico, 87102	Transportation, Housing and Urban Development, and Related Agencies	The requested funding would be used by the City of Albuquerque for the design and right of way purchase for the extension of Unser Boulevard. This extension would connect Unser Boulevard from Paseo del Norte to Paradise Boulevard on Albuquerque's west side. This completion would make Unser Boulevard only the second north/south corridor on the west side and provide an artery to the suburb of Rio Rancho. It will also spur economic development along the corridor benefiting residents and businesses. The requested project will create or sustain 232 jobs.
Community Safety	Valencia County Sheriff's Office	\$ 100,000.00	Valencia County Sheriff's Department, 444 Luna Avenue, Los Lunas, New Mexico, 87031	Commerce, Justice, Science and Related Agencies	The requested funding for the Valencia County Sheriff's Office would be used to update aging communication and emergency equipment for patrol vehicles. The emergency equipment has exceeded its lifespan making it a danger to the community because it is no longer effective. New and updated equipment would improve mobility, communications, and response times and assist officers in fighting crime. These funds will purchase in-car radios, laptop computers, and car cameras. The requested project will create or sustain 4 jobs.

This list is alphabetized by official project title and does not reflect any priority or preference whatsoever.  
This PDF is formatted to print on legal size paper.

Official Project Title	Potential Recipient	Requesting amount	Physical Address	Appropriations Bill	The funding would be used for:
COPS Rural Methamphetamine	New Mexico State Police	\$ 500,000.00	New Mexico State Police, 4491 Cerillos Road, Santa Fe, New Mexico, 87505	Commerce, Justice, Science and Related Agencies	The requested funding for the New Mexico State Police would be used for the detection and dismantling of methamphetamine laboratories operating in the State of New Mexico. The New Mexico State Police, in coordination with the Regional Drug Task Force, investigates crimes associated with methamphetamine production and distribution such as identify theft, violent crimes, and property crimes. The alarming rate in which methamphetamine production is growing in rural communities indicates that more resources must be allocated toward fighting this growing problem. These funds would continue and expand current programs by the New Mexico State Police to combat methamphetamine related crimes. The requested project will create or sustain 15 jobs.
Crash/Fire/Rescue Station	Kirtland Air Force Base	\$ 7,800,000.00	Kirtland Air Force Base, New Mexico, Bernalillo County, 87117	Military Construction, Veterans Affairs, and Related Agencies	The requested funding would be used to replace a existing crash/fire/rescue station on Kirtland AFB. Currently, Kirtland AFB uses runways owned by Albuquerque International Airport. The Air Force provides all crash/fire/rescue services for the runways. However, the current fire station has multiple deficiencies. Without this project the life-safety deficiencies in Station 5 will continue and the many other deficiencies will worsen with age and further erode the ability of firefighters and equipment to respond to critical runway emergencies where a few seconds of response time can mean the difference between life and death. Life-safety deficiencies such as sleeping room doors opening directly into the apparatus stalls with no other egress could mean inability to respond, injury, or even loss of life in the event of a fire in the apparatus stalls. The requested project will create or sustain construction jobs.
Develop Plant Data Base by Major BioZone in New Mexico	Xeriscape Council of New Mexico, Inc.	\$ 145,000.00	Xeriscape Council of New Mexico, Inc., 10824 Pennyback Park Drive, NE, Albuquerque, New Mexico, 87123	Agriculture, Rural Development, Food and Drug Administration, and Related Agencies	The requested funding will be utilized by the Xeriscape Council of New Mexico, Inc. to develop a Plant Data Base by Major Bio Zone in New Mexico. This research project focuses on native plants and outdoor water conservation. Native plants tend to survive on normal precipitation in their area and thus require much less supplemental water – a source of most outdoor water waste. Data from this research will be used to produce educational materials and to design and conduct trainings, with the goal of reducing water use in the Southwest and nationwide. This scientific and rigorous project will create and sustain research jobs. The requested project will create or sustain 19 jobs.
Distributed Mission Operation Center	Kirtland Air Force Base	\$ 7,800,000.00	Kirtland Air Force Base, New Mexico, Bernalillo County, 87117	Military Construction, Veterans Affairs, and Related Agencies	The requested funding would be used to expand current DMOC facilities. This classified environment has reached full capacity resulting in many users being turned away. The facility was originally designed to house 198 people, but currently houses 214 Military, Department of Defense civilians and contractors. It is projected to need a staff of 240 by Q1 2010 with an additional surge of 200+ local training participants during events like Virtual Flag. Electronics labs and storage have been converted to workstations and all current workstations have been compressed to 52 sq ft/person below AF standards, to make 25% more (42) new workstations. Evening and night work shifts have been added to more intensely use existing facilities. An exhaustive search for space has found that neither 505 CCW or Kirtland AFB facilities can provide the increased space that is needed. The requested project will create or sustain construction jobs.
Early Child Development Program	Save the Children	\$ 300,000.00	Save the Children, 126 Valencia Avenue NE, Suite F, Albuquerque, New Mexico, 87108	Labor, Health and Human Services, Education, and Related Services	The requested funding for is for the Save the Children Early Child Development Program. This program works in partnership with local schools to deliver early childhood development services to poor, isolated, and rural communities. This program teaches parents how to interact with children early on in order to promote literacy and language learning. Save the Children staff will work with parents to develop healthy child development through parent education groups and home visits. Before entering Kindergarten, families will also participate in transition to school activates that will connect families to teachers and faculty before the first day of school. The targeted schools in this program are in underserved areas in the First Congressional District. The requested project will create or sustain 6 jobs.
Efficient Irrigation for Water Conservation in the Rio Grande Basin	New Mexico State University	\$ 2,250,000.00	New Mexico State University College of Agriculture, 940 College Street, Las Cruces, New Mexico, 88003	Agriculture, Rural Development, Food and Drug Administration, and Related Agencies	The requested funding for the Efficient Irrigation for Water Conservation in the Rio Grande Basin project would be used for extension and research activities for a continuing joint project between New Mexico State University College of Agriculture, Consumer and Environmental Sciences; New Mexico Cooperative Extension Service; New Mexico Agricultural Experiment Station; producer groups; and irrigation districts. This initiative will continue to develop efficient agricultural and urban landscape irrigation systems to conserve water in the Rio Grande Basin, which runs through the heart of the First Congressional District. Topics include home water use and public water systems, positively affecting citizens in the First Congressional District. Drought conditions in New Mexico affect water supplies to agriculture causing serious adverse economic consequences to farm workers, producers, processors and related industries. The project seeks to mitigate this problem by increasing irrigation water use efficiency by agriculture and municipalities in New Mexico. The requested project will create or sustain 120 jobs.

This list is alphabetized by official project title and does not reflect any priority or preference whatsoever.  
This PDF is formatted to print on legal size paper.

Official Project Title	Potential Recipient	Requesting amount	Physical Address	Appropriations Bill	The funding would be used for:
Estancia Basin Regional Water Project	EMW Gas Association	\$ 2,340,000.00	EMW Gas Association, 408 5 <sup>th</sup> Street, Estancia, New Mexico, 87016	Interior, Natural Resources and Related Agencies	The requested funding would be used for the creation of a regional water system by the EMW Gas Association in rural Torrance County. The first phase of the project will provide distribution lines and storage capacity for the Town of McIntosh, which faces groundwater availability and contamination issues. This project is the first phase of a regional system to provide reliable and sanitary water distribution for the Estancia Valley. The requested project will create or sustain 50 jobs.
Evaluation and plan for the legal needs of sexual assault victims.	New Mexico Coalition for Sexual Assault Programs	\$ 150,000.00	New Mexico Coalition for Sexual Assault Programs, 3909 Juan Tabo, NE, Suite D, Albuquerque, New Mexico, 87107	Commerce, Justice, Science and Related Agencies	The requested funding for the New Mexico Coalition for Sexual Assault Program would be used for an evaluation and needs assessment for sexual assault victims in New Mexico. Currently, the New Mexico Coalition for Sexual Assault Program provides rape crisis services to victims of violent crimes. These funds would be used to evaluate the legal needs of sexual assault victims, provide training to sexual assault service providers on recognizing these needs and to build the community's capacity to provide the legal assistance to victims. The requested project will create or sustain 5 jobs.
Fiber Optic Feasibility	Estancia Valley Foundation for Economic Education and Development	\$ 150,000.00	Estancia Valley Foundation for Economic Education and Development, 2515 Highway 333, Moriarty, New Mexico, 87035	Financial Services and General Government	The requested funding would be used for a broadband feasibility study in rural New Mexico. A preliminary study of the Estancia Valley indicates that both education and industry oriented entities would benefit from reliable broadband access. These funds would be used to conduct a feasibility study for the installation of a fiber optic backbone to serve residents of the Estancia Valley. Current "line of sight" broadband and DSL capacity do not meet the educational or economic development needs of this rural county. The requested project will create or sustain 5 jobs.
Hiland Theater Renovation	National Dance Institute of New Mexico	\$ 411,079.00	National Dance Institute of New Mexico, 3301 Menaul Boulevard, NE, Suite 6, Albuquerque, New Mexico, 87102	Transportation, Housing and Urban Development, and Related Agencies	The requested funding would be used by the National Dance Institute of New Mexico to renovate the Hiland Theater in Albuquerque. The National Dance Institute of New Mexico (NDI-NM) provides after-school programs that serve over 3,000 students in the Albuquerque area whose families are at or near the poverty line. NDI-NM's program has shown a positive correlation for both academic success and childhood obesity rates. Students that participated show significantly greater test scores in math and reading and have a graduation rate of nearly 100%. Renovation of the Hiland Theater will provide an expansion of the program to serve a greater number of students. The requested project will create or sustain 150 jobs.
Isleta Blvd Rehabilitation	Bernalillo County	\$ 1,000,000.00	Bernalillo County, One Civic Plaza, NW, Tenth Floor, Albuquerque, New Mexico, 87102	Transportation, Housing and Urban Development, and Related Agencies	The requested funding would be used for the rehabilitation of pavement on Isleta Boulevard from Rio Bravo Boulevard to Interstate 25. This historic arterial provides access to numerous communities, public facilities, commercial centers, and a community college satellite campus. Isleta Boulevard is the only north/south arterial serving the 50,000 inhabitants west of the Rio Grande in Albuquerque's southwest valley. The requested project will create or sustain 90 jobs.
Master Facility Planning	Southwest Indian Polytechnic Institute	\$ 250,000.00	Southwestern Indian Polytechnic Institute, 9169 Coors Boulevard, NW, Albuquerque, New Mexico, 87120	Interior, Natural Resources and Related Agencies	The requested funding would be used to develop a facility master plan for the Southwestern Indian Polytechnic Institute (SIPI), a national Indian community college. The current campus was constructed in 1970 and is in need of renovations to meet the needs of a growing student population which includes members of over 150 federally-recognized tribes. A facilities master plan is needed to insure that the planned renovation creates a campus equipped to provide a high quality education to Native American students. The requested project will create or sustain 5 jobs.
Moriarty Street Lighting Replacement Project	City of Moriarty	\$ 210,500.00	City of Moriarty, located at 201 Broadway, Moriarty, New Mexico, 87035	Energy and Water Development	The requested funding would be used to retrofit 100 existing street lights with intelligent LED/solar hybrid lighting technology in the City of Moriarty. The installation of this new technology will reduce operating costs associated with energy consumption and operations and maintenance by approximately 80% for this rural community. A secondary benefit is related to public and pedestrian safety that will be improved by brighter and reliably operating street lights. The requested project will create or sustain 15 jobs.

This list is alphabetized by official project title and does not reflect any priority or preference whatsoever.  
This PDF is formatted to print on legal size paper.

Official Project Title	Potential Recipient	Requesting amount	Physical Address	Appropriations Bill	The funding would be used for:
NBII Node for the Ecological Sciences	University of New Mexico	\$ 1,000,000.00	University of New Mexico, 1 University of New Mexico, MSC05 3020, Albuquerque, New Mexico, 87131	Interior, Natural Resources and Related Agencies	The requested funding would be used for the establishment of the National Biological Information Infrastructure (NBII) Ecological Sciences Node at the University of New Mexico. The NBII Node will preserve, analyze and synthesize data related to ecological and environmental research projects. The NBII Node will leverage ongoing activities associated with numerous research efforts including the National Science Foundation supported DataONE and Long-Term Ecological Research network programs. The requested project will create or sustain 12-14 jobs.
Partnerships for Emerging Energy Technologies	University of New Mexico	\$ 2,000,000.00	University of New Mexico, 1 University of New Mexico, Albuquerque, New Mexico, Bernalillo County, 87131	Defense	The requested funding would be used to create the Partnership for Emerging Energy Technologies (PEET), which is a strategic initiative of the University of New Mexico that builds on Center for Emerging Energy Technologies and includes cooperation across the State and nationally, continuing the cooperation with the University of Tennessee. The objective of the PEET is to stimulate research, development and education activities linked to the design, fabrication, characterization, simulation and integration of emerging energy technologies and systems. The requested project will create or sustain 17 jobs.
Phase II- Health Center Addition to Improve Behavior Health Services	Pueblo of Sandia	\$ 326,656.00	Pueblo of Sandia, 481 Sandia Loop, Bernalillo, New Mexico, 87004	Labor, Health and Human Services, Education, and Related Services	The requested funding would be used to expand and construct the Pueblo of Sandia Behavioral Health Services Center. The expansion and construction would improve the Behavioral Health Services Center by providing the space and ability to deliver family counseling and support, mental and substance abuse services, and anger management services. Through expansion of these services, the Pueblo of Sandia can address the greatest needs facing their community. This behavioral specialty center would be open to all Native Americans in the region. The requested project will create or sustain 5 jobs.
Presbyterian Medical Services-Esperanza Family Health Center Expansion Project	Presbyterian Medical Services-Esperanza Family Health Center	\$ 100,000.00	Presbyterian Medical Services Esperanza Family Health Center, 903 C 5 <sup>th</sup> Street, Estancia, New Mexico 87016	Labor, Health and Human Services, Education, and Related Services	The requested funding would be used to purchase equipment and furniture for Presbyterian Medical Services Esperanza Family Health Center. Through a partnership between Torrance County and Presbyterian Medical Services, this rural clinic will complete construction on a 1,600 square foot expansion this year. This funding would provide the funds to purchase equipment needed for the expansion, specifically dentistry, medical, and behavioral support. As the sole dental provider in Torrance County, this clinic will serve a rural county that has limited access to medical services and hospitals. The requested project will create or sustain 2 jobs.
Replace Fire Station 3	Kirtland Air Force Base	\$ 6,800,000.00	Kirtland Air Force Base, New Mexico, Bernalillo County, 87117	Military Construction, Veterans Affairs, and Related Agencies	The requested funding would be used to rebuild and replace Fire Station 3 on Kirtland Air Force Base. Without this project the life-safety deficiencies in Station 3 will continue and the many other deficiencies will worsen with age and further erode the ability of firefighters and equipment to respond to critical emergencies. Response times from the present location will continue to be long, particularly to KUMMSC, where a few seconds of response time can mean the difference in preventing injuries and major losses. The requested project will create or sustain construction jobs.
Rio Grande Environmental Management Program, CO, NM & TX	Army Corps of Engineers	\$ 500,000.00	Army Corps of Engineers – Albuquerque District, 4101 Jefferson Plaza, NE, Albuquerque, New Mexico, 87109	Energy and Water Development	The requested funding for the Rio Grande Environmental Management Program, Colorado, New Mexico and Texas would be used to carry out a management program for planning, construction, evaluation of habitat management, and long term monitoring for the Rio Grande Basin. The Rio Grande Basin runs through the heart of the First Congressional District of New Mexico and sound water resource management practices along the river are crucial for our future generations. The requested project will sustain jobs within the Army Corps of Engineers.
Sandoval County Emergency Operations Center	Sandoval County	\$ 549,200.00	Sandoval County, 711 Camino Del Pueblo, Bernalillo, New Mexico, 87004	Homeland Security	The requested funding for Sandoval County would be used to equip a new regional Emergency Operations Center in Sandoval County. The facility will provide interoperability functions for State, Tribal, and Municipal first responders throughout Central New Mexico. These funds would cover equipment and support software such as video, teleconferencing, and microwave links to facilitate the interoperability, functionality and training capabilities of the Emergency Operations Center. The requested project will create or sustain 15 jobs.

This list is alphabetized by official project title and does not reflect any priority or preference whatsoever.  
This PDF is formatted to print on legal size paper.

Official Project Title	Potential Recipient	Requesting amount	Physical Address	Appropriations Bill	The funding would be used for:
South Valley Economic Development Center Phase II	South Valley Economic Development Center	\$ 150,000.00	South Valley Economic Development Center, 318 Isleta Boulevard, SW, Albuquerque, New Mexico, 87105	Financial Services and General Government	The requested funding would be used for the design of a planned expansion of the South Valley Economic Development Center small business incubator. The South Valley Economic Development Center offers access to a commercial kitchen, as well as business training for entrepreneurs and small business owners in Albuquerque's South Valley. This expansion would provide additional opportunities for small business growth and economic development. The requested project will create or sustain 5 jobs and create long term small business support.
Southern Great Plains Dairy Consortium	New Mexico State University	\$ 1,000,000.00	New Mexico State University College of Agriculture, 940 College Street, Las Cruces, New Mexico, 88003	Agriculture, Rural Development, Food and Drug Administration, and Related Agencies	The requested funding for New Mexico State University College of Agriculture, Consumer and Environmental Sciences for the Southern Great Plains Dairy Consortium would address the major research and educational needs of the rapidly expanding dairy industry in the Southern Great Plains of New Mexico. This research deals with improved management practices to minimize environmental impact, optimize efficiency of production and energy conversion, and related human resource issues that impact the region. Addressing the major issues of the dairy industry in terms of dairy production, environmental stewardship, and bio-energy conversion, contributes to the success of dairy farms in the rural areas of the First Congressional District of New Mexico. The requested project will create or sustain 75 jobs.
Southwest Valley Flood Damage Reduction, Albuquerque, NM	Army Corps of Engineers	\$ 5,224,000.00	Army Corps of Engineers – Albuquerque District, 4101 Jefferson Plaza, NE, Albuquerque, New Mexico, 87109	Energy and Water Development	The requested funding for the Southwest Valley Flood Damage Reduction project would be used to continue construction of an engineered drainage system for Albuquerque's Southwest Valley. The Southwest Valley is subject to flooding from the West Mesa runoff and is not sufficiently protected from flood damage. Storm waters flood developed areas in the Southwest Valley because the property is lower than the river. This project would significantly reduce the flood damage to the community and protect agricultural land. Additionally, this project would reduce the number of residents in the Southwest Valley required to purchase flood insurance due to recent remapping of the floodplain by FEMA. The requested project will create or sustain 100 jobs.
Summer Youth Sports Program	University of New Mexico	\$ 90,000.00	1 University of New Mexico, Johnson Center Room 1150, MSC04 2610, Albuquerque, New Mexico, 87131	Labor, Health and Human Services, Education, and Related Services	The requested funding for is for the University of New Mexico Summer Youth Sports Program. This four week program focuses on health and nutrition through a two hour per day course that serves 400 economically disadvantaged children. Students are exposed to career development, nutrition, public safety, and drug/alcohol abuse prevention, while also being provided with two nutritional meals a day. The requested project will create or sustain 35 jobs.
Technology Research and Innovation Outreach for Space	Technology Ventures Corporation	\$ 3,000,000.00	Technology Ventures Corporation, 1155 University Blvd. SE, Albuquerque, New Mexico, Bernalillo County, 87116	Defense	The requested funding will be used to create an organization that will assist in the expansion of the number of private sector companies, universities, and government entities participating in the nation's growing high-tech Small Satellite Space Industry. The expanded industry, academic, and workforce base will directly benefit the Department of Defense space organizations at Kirtland Air Force Base; the Air Force Research Lab Space Vehicles and Directed Energy Directorates, the Operationally Responsive Space Office, and the Space Development and Test Wing; by providing ready access to innovative vendors and well-qualified scientists, engineers, and technicians. This will expedite the development and launch of the new small, lower cost, responsive space systems required to support Department of Defense's numerous and rapidly changing war fighter missions around the world. The requested project will create or sustain 9 jobs.
Transitional Living Program for At-Risk Women Veterans with Children	YWCA Middle Rio Grande	\$ 450,000.00	YWCA Middle Rio Grande, 210 Truman Street, NE, Albuquerque, New Mexico, 87108	Commerce, Justice, Science and Related Agencies	The requested funding for the YMCA Middle Rio Grande would be used for a comprehensive transitional living program for at-risk women veterans and their children. The YWCA has partnered with the Veterans Administration to address the medical and psychological needs of women veterans. The YWCA will offer skills assessment, referral to education and other programming that will prepare the veterans for successful entry into the workforce. These funds would also be used to provide counseling services, substance abuse treatment programs and shelter for at-risk women veterans and their families. The requested project will create or sustain 4 jobs.
University Strategic Partnership	University of New Mexico	\$ 5,000,000.00	University of New Mexico, 1 University of New Mexico, Albuquerque, New Mexico, Bernalillo County, 87131	Defense	The requested funding would be used to increase research and development partnerships between public universities and the Department of Defense. This partnership provides faculty, undergraduates, and graduate students with exceptional opportunities to contribute to critical research and development goals that will shape future missions. These technical goals foster numerous opportunities for research initiatives in biotechnology, materials science, situational awareness, infectious diseases, radiation detection, medical sciences and social network theory. Current and future partnerships research projects in biomedical sciences, energetic systems, information-decision support models, standoff detection technologies, and network survivability would enhance Defense Threat Reduction Agency's mission objectives. The requested project will create or sustain 50 jobs.

This list is alphabetized by official project title and does not reflect any priority or preference whatsoever.  
This PDF is formatted to print on legal size paper.

Official Project Title	Potential Recipient	Requesting amount	Physical Address	Appropriations Bill	The funding would be used for:
UNM Health Sciences Center Clinical and Translational Sciences Center Renovation Project	University of New Mexico	\$ 3,200,000.00	University of New Mexico Health Sciences Center Clinical and Translational Science Center, 1 University of New Mexico, MSC08 4640, Albuquerque, New Mexico, 87131	Labor, Health and Human Services, Education, and Related Services	The University of New Mexico has requested funding for the renovation of the Health Sciences Center Clinical and Translational Science Center, which will house six research labs and clinical trial space. As health sciences develop, clinical facilities must also develop to meet the needs of new research projects. This renovation will accelerate the translation of scientific discovery in a lab to improving the health of populations in the First Congressional District through clinical research and trials. The requested project will create or sustain 75 jobs.
Using Genomics to Safeguard NM as a Bovine TB-free State	New Mexico State University	\$ 800,000.00	New Mexico State University College of Agriculture, 940 College Street, Las Cruces, New Mexico, 88003	Agriculture, Rural Development, Food and Drug Administration, and Related Agencies	The requested funding would be used to assist New Mexico in the prevention of bovine tuberculosis infections by using the latest in genomic sequencing technology. Through research and development conducted by New Mexico State University, these funds would be used to develop diagnostic and monitoring protocols for the monitoring of bovine tuberculosis throughout the state. The establishment of a strategy is of the utmost importance for New Mexico to avoid the future loss of tuberculosis-free status should an outbreak occur. This requires an early detection tool that is cost-effective and which can be used in long-term monitoring programs of livestock and wildlife to detect emerging bovine tuberculosis infections. The requested project will create or sustain 16 jobs.
Valley Utilities Project	Bernalillo County	\$ 3,410,000.00	Bernalillo County, One Civic Plaza, NW, Tenth Floor, Albuquerque, New Mexico, 87102	Interior, Natural Resources and Related Agencies	The requested funding would be used for the installation of water distribution lines to provide potable water to underserved areas of Albuquerque's South Valley. Groundwater contamination is a major concern to many residents who lack municipally delivered potable water. This project will provide reliable and sanitary potable water delivery service to these residents. The requested project will create or sustain 27 construction jobs and 59 support jobs.
Water and Sewage Distribution System Improvements	Town of Bernalillo	\$ 800,000.00	Town of Bernalillo, 829 Camino Del Pueblo, Bernalillo, New Mexico, 87004	Interior, Natural Resources and Related Agencies	The requested funding would be used for the replacement of distribution and collection lines in the water and wastewater systems for the Town of Bernalillo. The existing water system has become a health, safety and public welfare issue due to an excessive number of line breaks in existing galvanized pipelines. Water and wastewater system improvements will reduce contamination of potable water and reduce the community's overall water use. The requested project will create or sustain 50 jobs.
